

Subject: RoHS, WEEE and ELV Directives

This statement is made by **Systems Print Media Limited** in response to your request for composition information, related to implementation of the European Union's Restriction on Hazardous Substances (RoHS) Directive (2002/95/EC) the related Waste Electrical and Electronic Equipment (WEEE) Directive (2002/96/EC) and the End of Life of Vehicle (ELV) Directive (2000/53/EC).

You requested information regarding the following product(s):

- **TBC**

We certify, on behalf of Systems Print Media Limited, that, to the best of our knowledge, the following substances are or are not present at or above the concentrations indicated, in the product(s) listed above:

Substance	Product Contains*	Product Does Not Contain*
Lead (Pb) (if alloying element in steel, aluminium or copper, provide percent lead content by weight)		✓
Mercury (Hg)		✓
Cadmium (Cd)		✓
Hexavalent Chromium (CR6)		✓
Polybrominated Biphenyls (PBB)		✓
Polybrominated Diphenyl Ethers (PBDE)		✓

General Notes

"Product Contains" or "Product Does Not Contain" means that the material is or is not present at or above 0.1%, or for cadmium, is or is not present at or above 0.01%.

Note that although the RoHS Directive does not specify a minimum threshold, these are the maximum concentration values (MCVs) that are based on the Joint Industry Guide, and are being considered for ratification by the EC Environmental Council. The MCVs are by weight in homogeneous materials.

In preparing this response, Systems Print Media Limited has in good faith relied in part on information provided by our suppliers.

The packaging and packaging components for the above-noted products comply with the CONEG and European Union requirements for heavy metal content in packaging materials: namely, that the sum of incidental concentration levels of lead, mercury, cadmium and hexavalent chromium present in any package or packaging component do not exceed 100 parts per million by weight.

In cases where the regulated materials are present at levels below a total of 100 ppm, the regulated metals were not intentionally added during the manufacturing process.
